

Wireless Validation Survey

Having trouble with your Wi-Fi...
Connection Dropping Out?
Poor Coverage?
Slow Speeds?

Here at DSIS Solutions we use the latest Ekahau planning, site survey and spectrum analysis software. Coupled with our bespoke survey rigs we can survey any environment.

A site survey is key to getting your wireless install right and not wasting your IT budget on an ineffective solution. Just because you're installed the latest and greatest hardware doesn't necessarily mean it will perform that way in your environment.

Don't panic though! Its not too late, if you have installed a new system or you'd like a health check on your existing system DSIS can offer a **Post Install Validation Survey**. We will look at coverage, capacity and the RF spectrum to detect any problems and provide you with a full report and a suggested path to recovery. Sometimes a few simple tweaks is all it takes!

Take advantage of our current offer and have us come in and carry out a **Post Install Validation Survey**.

Up to 15 Access Points	£ 190
Up to 40 Access Points	£ 285
Over 40 Access Points	£ P.O.A
